## THE REASON AND THE TARGET

REASON

Currently, businesses are facing many difficulties in effective project management due to the lack of a unified and professional system. Manual management through Excel and paperwork not only takes a lot of time and effort but also easily leads to errors.

Therefore, the need to apply technology to project management is increasing to improve efficiency and productivity.

TARGET

Building a VWORK enterprise project management website helps businesses save time and resources, improve work efficiency and increase productivity, reduce risks and increase project success rates.
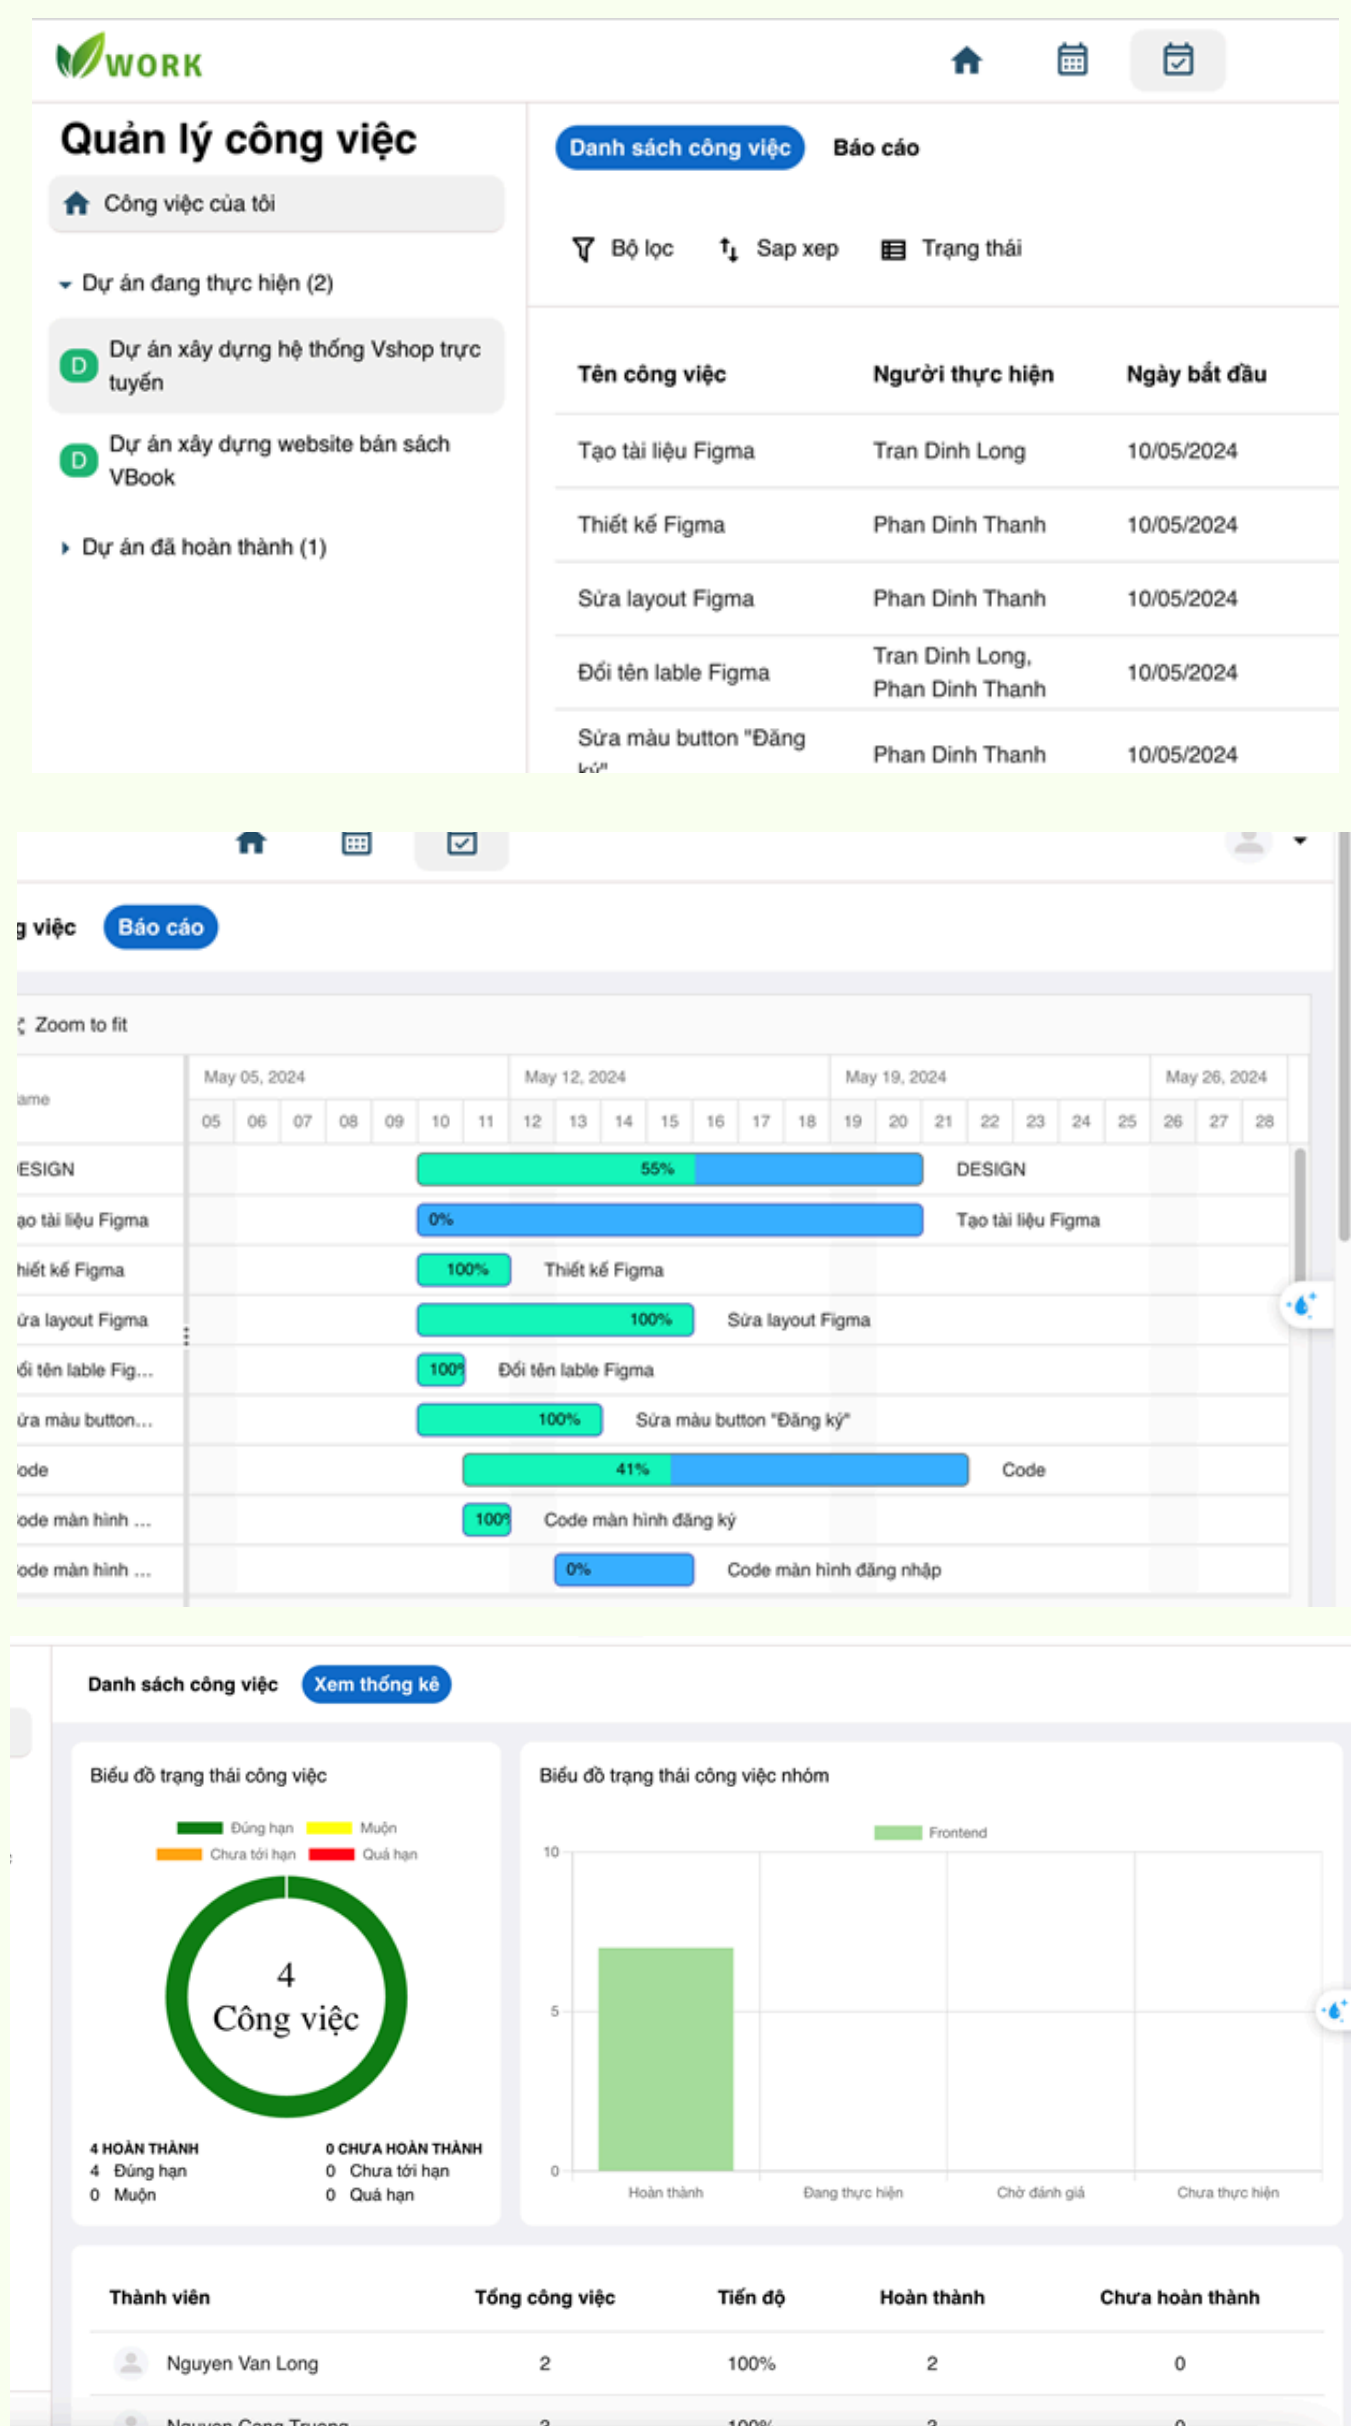

APPLIED TECHNOLOGIES

MATERIALS AND METHODS

CONCLUSION

With the implementation of the VWORK project management website, businesses will achieve many important benefits, not only improving management efficiency, saving time and costs, but also enhancing cooperation and communication between departments. project team member. In addition, the website will help minimize risks and errors during project implementation, thereby improving work productivity and business competitiveness.

WAY FOR IMPROVEMENT

1. Continue to improve features to improve and upgrade the program.

2. Improved security features.

3. Develop the system towards multi-language support.

4. Develop additional chat group exchange features on the website.
